# ER Drop Pods tokens (v1.0)

These tokens approximate the Drop Pods tokens that Games Workshop originally produced for *Space Marine* (Epic 2nd edition). They're just as useful for *Epic 40,000* and *Epic Remastered*.

Set your printer to scale for A4 paper, to get 15 mm square tokens. You only really need one set, but given the space available on this page I've included extras. Print... cut out... and use them to strike deep into enemy-held territory! — *Eric Weston*

- **For single-sided tokens (easiest to make)**: Ideally, print onto thin card, perhaps ~400 gsm. Or, print onto self-adhesive paper and then apply to card.
- **For double-sided tokens (more convenient in use)**: I suggest that you print on heavy paper (perhaps ~200 gsm). Then, fold each paired set along the corresponding dashed thin line as precisely as you can, and glue the two sides together (photo mount spray is good for this).
